Turn to the Power of Purple to power-up your profit potential.

Turn up your profit potential when your shop utilizes *the best performing finishing discs on the market* – the new line of 3M™ Purple Clean Sanding Discs. With an advanced logarithmic spiral design, it's never been easier to help improve your automotive finishing productivity, performance and profitability. Power-packed with 3M™ Innovation and Ingenuity, these premium discs feature high-end abrasives that are in it for the long haul. Experience improved cut rates and extended disc life. With the revolutionary Clean Sanding multi-hole pattern technology, these discs have the incredible built-in ability to greatly improve disc performance – with or without a tool vacuum system – and deliver a more consistent finish.

What the power of 3M™ Purple Clean Sanding Discs can do for you:

- **Extend disc life** – More power to go the distance with discs that can last 2-3 times longer than traditional no-hole, 5-hole or 6-hole discs.
- **Increase productivity** – Longer-lasting discs improve productivity and the unique multi-hole disc pattern is designed for quicker changes because hole alignment is not required. You'll see the difference in material consumption – and your bottom line.
- **Clear out more dust with less disc loading** – The logarithmic, spiral-patterned disc design features hundreds of holes to give dust a better escape route, moving more dust away from your finishing surface without loading the disc. Dust settles into the loops of the disc pad, and not in the air or on the disc surface.
- **Improve cutting ability** – Premium abrasives deliver consistent performance to get the job done ... and done right.
- **Simplify disc application** – Discs utilize the 3M™ Hookit™ Attachment System for easy reuse.

Go the distance. Go purple.

Put the power of purple to work for you with 3M™ Purple Clean Sanding Discs and significantly improve your automotive finishing productivity, performance and – ultimately – profitability.

3M™ Purple Clean Sanding Discs

Features

- Precisely-patterned openings
- Hookit™ backing

Advantages

- Reduced loading
- Up to two-times longer disc life than no-hole abrasives*
- Improved dust extraction over 5-hole and 6-hole discs
- Lining up disc holes with disc pad holes not required

Benefits

- Can reduce consumable costs
- Can improve productivity
- Cleaner work area

*Results may vary based on application.
